

*5/25/2017 Beach fill / Dunes Project Update*

*The Army Corps informed The City of Margate the laying of the submerge line should begin the end of next week. This line will be installed at Fredericksburg Avenue on the border with Ventnor. Once the Hopper Dredge arrives, they will pump some sand (a couple of hundred feet) in that area before they begin moving north into Ventnor. The area affected on Fredericksburg will be approximately 30' by 30'. Once the equipment arrives, it will remain there until approximately September 20. This will affect the residents of Fredericksburg Avenue and Andover Avenue for the duration of the project.*
