

**REGULAR MEETING MINUTES
CITY COMMISSION – MARGATE CITY**

May 18, 2017

MARGATE CITY, NEW JERSEY

THE PRESS AND THE DOWNBEACH CURRENT WERE NOTIFIED OF THESE MEETINGS AND A COPY OF SAME WAS POSTED ON THE BULLETIN BOARD AND THE MUNICIPAL WEBSITE

The Regular Meeting of the Board of Commissioners was held on the above date at 4:45 p.m. The meeting began with a flag salute and roll call: Mayor Becker and Mr. Amodeo were present. Mr. Amodeo informs the public that Mr. Blumberg is absent due to picking his daughter's up from college. Chief Wolfson, Mr. Deaney and Mr. Abbott were also present. The minutes from May 4, 2017, Workshop, Regular and Capital were approved as read on motion by Mr. Amodeo, second by Mayor Becker with a vote of three ayes.

Public Comment:

Art Cautilli- 113 N. Lancaster Ave. -Speaks on School Cost and loss of 96 students.

John Sewell- 22 west Drive- Speaks on School budget and cost per pupil.

Steve Woerner- 103 S. Sumner Ave. – Speaks on Narcan situation and Over Dose epidemic and suggest more be done to help.

Seeing that there were no further comments, a motion to close the Public Comments was put forth by Mr. Amodeo, second by Mayor Becker with a vote of three ayes.

Public Comment on Resolutions and Ordinance Adoption:

Seeing that there were no further comments, a motion to close the Public Comments on Resolutions or Ordinance items was put forth by Mr. Blumberg, second by Mayor Becker with a vote of three ayes.

Ordinance Introduction:

A motion to introduce Ordinance #10-2017 was put forth by Mayor Becker, second by Mr. Amodeo

ORDINANCE #10-2017AN ORDINANCE AMENDING CHAPTER 132 "FEES" OF THE CODE OF THE CITY
OF MARGATE CITY, COUNTY OF ATLANTIC AND STATE OF NEW JERSEY

BE IT ORDAINED by the Commissioners of the City of Margate, County of Atlantic and State of New Jersey that the following be ADDED to Chapter 132. FEES:

ARTICLE III. FEES & RATES FOR RECREATION DEPARTMENT**SECTION 132-7. RATES & FEES ESTABLISHED**

F. Program Fees

Youth Rec Soccer	\$30
Soccer Sponsors	\$250
Youth Rec Basketball	\$30
Youth Travel Basketball	\$50 \$60
Adult Men's League Basketball	\$45 \$50
Basketball Sponsors	\$100
Margate Punt, Pass, & Kick	\$10
Open Flag Football	\$110 per session
Youth Kickball	\$30
Youth Field Hockey	\$25
Field Hockey Camp	\$20 per day \$22 per day
Summer Camp	\$24 per half day
Gymnastic Camp	\$125
Summer Basketball League	\$350 per Team \$500
Summer Basketball Sponsor	\$100 per Team
Summer Basketball (Margate resident)	\$25 per player
Tennis Clinics	\$15 per day
Tennis Camps	\$25 per day
Twilight Tennis Open Sponsor	\$100
Twilight Tennis Open (Singles)	\$25
Twilight Tennis Open (Singles-Margate resident)	\$20
Twilight Tennis Open (Doubles)	\$30 per Team
Twilight Tennis Open (Doubles-Margate resident)	\$25 per Team
Senior Lunches	\$6
Senior Pavilion Entry Fee	\$1
Senior Lunch/Dinner Bus Trips	\$5 + Direct Cost
Senior Aerobics	Free
Children's Classes	\$20-\$30 per session
Adult Education Classes	\$35-\$50 per session
Adult Art Classes	\$25-\$40 per session
Cooking Classes	\$20 per session
Piano/Guitar Classes	\$25 per session

Foreign Language Classes		\$15-\$20 per session
Martial Arts Classes		\$149 per session \$15-\$20 per session
Gymnastics Classes		\$10 per session \$10-\$15 per session
Technology Workshops		\$25 per session
Financial Workshops		Free
Basic Dog Obedience		\$65 per session
Soul Line Dancing		\$7 per session
NYC Bus Trips		\$35 \$40
Margate Madness Tournament		\$160
Pickleball		\$50 annual pass/\$5 daily
STEAM Camp		Not to exceed \$40 per day
Marine Science Camp		Not to exceed \$70 per day
Adult Self Defense Classes		\$15-\$20 per session
College Workshops		\$50
Golf Lessons		\$14-\$20 per session
Semet Soccer Camp		\$20-\$30 per session
Challenger Soccer Camp	Age 3-4	\$100
	Age 4-5	\$120
	Age 5-14	\$156
Rugby Camp		\$156
Mad Science Camp		\$175
Fantastic Friday		\$5

SECTION 2: The remainder of Section 257-41 herewith is hereby to remain unchanged.

SECTION 3: This ordinance shall take effect upon final adoption and publication and in the manner provided by law

A motion to introduce Ordinance #11-2017 was put forth by Mayor Becker, second by Mr. Amodeo

**ORDINANCE #11-2017AN ORDINANCE AMENDING CHAPTER 257, VEHICLES AND
TRAFFIC, OF THE CODE OF THE CITY OF MARGATE CITY, COUNTY OF ATLANTIC
AND STATE OF NEW JERSEY**

BE IT ORDAINED by the Commissioners of the City of Margate City, County of Atlantic and State of New Jersey as follows:

SECTION 1. Margate City Code **Chapter 257-15** shall be amended to **add** the following locations for handicapped parking within the City of Margate City:

257-15 Handicapped Parking on Street

<u>Name of Street</u>	<u>Side</u>	<u>Location</u>
10 North Hanover Ave	West	From a point 411 feet south of the southerly curbline of Winchester Avenue to a point 22 feet south thereof.

SECTION 2. All ordinances or parts of ordinances inconsistent with any terms of this ordinance are hereby repealed to the extent of such inconsistency only.

SECTION 3. This ordinance shall take effect upon its final passage and publication as required by law.

A motion to adopt Ordinance #08-2017 was put forth by Mayor Becker, second by Mr. Amodeo

CITY OF MARGATE CITY ORDINANCE #08-2017**AN ORDINANCE AMENDING AND SUPPLEMENTING CHAPTER 145 “FLOOD HAZARD AREAS” OF THE CODE OF THE CITY OF MARGATE CITY, COUNTY OF ATLANTIC, STATE OF NEW JERSEY.**

BE IT ORDAINED by the Board of Commissioners of the City of Margate City as follows:

WHEREAS, The Mayor and Board of Commissioners of the City of Margate City, New Jersey find that the prevention of flooding is an urgent matter; and

WHEREAS, the State of New Jersey, Department of Environmental Protection, Office of Engineering and Construction, Bureau of Dam Safety and Flood Control, by letter of February 4, 2013 has instructed the Mayor and local Floodplain Administrator that in order for the residents of the City of Margate City to be eligible for Increased Cost of Compliance (ICC) and other federal hazard mitigation grant funds, it is recommended that your community readopt its current Local

flood Damage Prevention Ordinance to meet or exceed the requirements of the amended Flood Hazard Area Control Act Rules; and

WHEREAS, The Legislature of the State of New Jersey has in *N.J.S.A. 40:48-1, et seq.*, delegated the responsibility to local governmental units to adopt regulations designed to promote public health, safety, and general welfare of its citizenry.

THEREFORE, the Mayor and Board of Commissioners of the City of Margate City, New Jersey does ordain as follows.

**SECTION I
STATUTORY AUTHORIZATION, FINDINGS OF FACT,
PURPOSE AND OBJECTIVES**

§145-1: STATUTORY AUTHORIZATION

The Legislature of the State of New Jersey has in *N.J.S.A. 40:48-1, et seq.*, delegated the responsibility to local governmental units to adopt regulations designed to promote public health, safety, and general welfare of its citizenry. Therefore, the Board of Commissioners of the City of Margate City, Atlantic County, New Jersey does ordain as follows:

§ 145-2: FINDINGS OF FACT

(A) The flood hazard areas of the City of Margate City are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety, and general welfare.

(B) These flood losses are caused by the cumulative effect of obstructions in floodplains which increase flood heights and velocities, and when inadequately anchored, causes damage in other areas. Uses that are inadequately flood proofed, elevated or otherwise protected from flood damage also contribute to the flood loss.

§145-3: PURPOSE

It is the purpose of this ordinance to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed:

- A. To protect human life and health;
- B. To minimize expenditure of public money for costly flood control projects;
- C. To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
- D. To minimize prolonged business interruptions;
- E. To minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets, bridges located in areas of special flood hazard;
- F. To help maintain a stable tax base by providing for the second use and development of areas of special flood hazard so as to minimize future flood blight areas;
- G. To ensure that potential buyers are notified that property is in an area of special flood hazard; and
- H. To ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

§145-4: METHODS OF REDUCING FLOOD LOSSES

In order to accomplish its purposes, this ordinance includes methods and provisions for:

- A. Restricting or prohibiting uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;
- B. Requiring that uses vulnerable to floods including facilities which serve such uses, be protected against flood damage throughout their intended life span;
- C. Controlling the alteration of natural flood plains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;
- D. Controlling filling, grading, dredging, and other development which may increase flood damage; and,
- E. Preventing or regulating the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards in other areas.

**SECTION 2
DEFINITIONS****§145-5. DEFINITIONS**

- A. Unless specifically defined below, words or phrases used in this ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its' most reasonable application.**

“Advisory Base Flood Elevation (ABFE)” means the elevation shown on a community’s Advisory Flood Hazard Map that indicates the advisory still water elevation plus wave effect (ABFE = SWEL + wave effect) resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year.

“Advisory Flood Hazard Area (AFH)” means the land in the floodplain within a community subject to flooding from the 1 % annual chance event depicted on the Advisory Flood Hazard Map.

“Advisory Flood Hazard Map” means the official map on which the Federal Emergency Management Administration has delineated the areas of advisory flood hazards applicable to the community.

“Agency” means the Federal Emergency Management Agency, Washington, DC.

“Appurtenant Structure” “Accessory Structure” means a structure that is located on the same parcel of property as the principle structure and the use of which is incidental to the use of the principle structure.

"Appeal" means a request for a review of the Construction Official/Floodplain Manager's interpretation of any provision of this ordinance or a request for a variance.

"Area of shallow flooding" means a designated AO, AH, or VO zone on a community's Digital Flood Insurance Rate Map (DFIRM) with a one percent annual or greater chance of flooding to an average depth of one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

"Area of special flood hazard" means the land in the flood plain within a community subject to a one percent or greater chance of flooding in any given year. It is shown on the FIRM as Zone V, VE, V1-30, A, AO, A1-A30, AE, A99 or AH.

"Base Flood Elevation (BFE)" The flood elevation shown on a published Flood Insurance Study (FIS) including the Flood Insurance Rate Map (FIRM). For zones AE, AH, AO, and A1-30 the elevation represents the water surface elevation resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year. For zones VE and V1-30 the elevation represents the Stillwater elevation (SWEL) plus wave effect ($BFE = SWEL + \text{wave effect}$) resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year.

"Basement" means any area of the building having its floor sub-grade (below ground level) on all sides.

“Best Available Flood Hazard Data – The most recent available flood risk guidance FEMA has provided. The Best Available Flood Hazard Data may be depicted on but not limited to Work Maps or Preliminary FIS and FIRM.

"Breakaway wall" means a wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or supporting foundation system.

“Building” see structure.

“Building Height” (Margate Requirement) the vertical height of a structure or building measured from the minimum first floor elevation of the structure or building to the highest point of the coping of a flat roof, or the highest gable of a pitched roof. The first floor elevation for all new construction, substantial improvements and substantial additions shall be based on one foot freeboard in any A Zone and two feet in any V Zone above the new ABFE or any subsequent flood hazard maps promulgated by the Federal Emergency Management Administration.

“Certification” means a certification by a registered professional engineer or other party, does not constitute a warranty or guarantee of performance, expressed or implied. Certification of data is a statement that the data is accurate to the best of the certifier’s knowledge. Certification of analysis is a statement that the analysis has been performed correctly and in accordance with sound engineering practices. Certification of structural works is a statement that the works are designed in accordance with sound engineering practices to provide protection from the base flood. Certification of “as built” conditions is a statement that the structure(s) has been built according to the plans being certified, is in place, and is fully functioning.

“Coastal High-Hazard Area” means an area of special flood hazard extending from offshore to the inland limit of a primary frontal dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. The area designated on a Flood Insurance Rate Map (FIRM) as Zone V1-V30.

“Community Rating System” means the National Flood Insurance Program’s (NFIP) Community Rating System (CRS) which is a voluntary incentive program that recognizes and encourages community floodplain management activities that exceed the minimum NFIP requirements.

“Critical Facility” means a facility for which a moderate chance of flooding might be too great. Critical facilities include, but are not limited to schools, nursing homes, hospitals, police, fire and emergency response installations, installations which produce, use or store hazardous materials or hazard

“Design Flood Elevation” shall be the base flood elevation plus one foot and in the V-zone shall be base flood elevation plus two feet.

“Development” means any man made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations, or storage of equipment or materials located within the area of special flood hazard.

“Digital Flood Insurance Rate Map (DFIRM)” means the official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

“Elevated building” means a non-basement building (i) built in the case of a building in an Area of Special Flood Hazard to have the top of the elevated floor or in the case of a building in a Coastal High Hazard Area to have the bottom of the lowest horizontal structural member of the elevated floor elevated above the ground level by means of piling, columns (posts and piers), or shear walls parallel to the flow of the water, and (ii) adequately anchored so as not to impair the structural integrity of the building during a flood up to the magnitude of the base flood. In an Area of Special Flood Hazard "elevated building" also includes a building elevated by means of fill or solid foundation perimeter walls with openings sufficient to facilitate the unimpeded movement of flood waters. In Areas of Coastal High Hazard “elevated buildings” also includes a

building otherwise meeting the definition of “elevated building” even though the lower area is enclosed by means of breakaway walls.

“Enclosure” means a non-habitable, unfinished or flood-resistant space below the base flood elevation (BFE) usable solely for parking of vehicles, storage and building access to the first floor. Such space shall not be partitioned into multiple rooms, temperature-controlled, or used for human habitation. The storage permitted in an enclosure shall be limited to that which is incidental and accessory to the principal use of the structure. Storage should be limited to items such as lawn and garden equipment, beach chairs, and bicycles which either have a low damage potential or that can be easily moved to the elevated portion of the building if there is a flood.

“Erosion” means the process of the gradual wearing away of land masses.

“Existing construction” means, for the purposes of determining insurance rates, structures for which the “start of construction” commenced before the effective date of the FIRM or before January 1, 1975.

“Flood or flooding” means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (1) The overflow of inland or tidal waters and/or
- (2) The unusual and rapid accumulation or runoff of surface waters from any source.

“Flood Insurance Rate Map” (FIRM) means the official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

“Flood Insurance Study” (FIS) means the official report in which the Federal Insurance Administration has provided flood profiles, as well as the Flood Insurance Rate Map(s) and the water surface elevation of the base flood.

“Floodplain” means any land area susceptible to being inundated by water from any source.

“Floodplain Management” means the operation of an overall program of corrective and preventative measures for reducing flood damage, including but not limited to emergency preparedness plans, requirements for zoning, subdivision or building, and special purpose floodplain management regulations.

“Floodplain Management Regulations” means zoning ordinances, subdivision regulations, building codes, health regulations, special purpose ordinances (such as a flood plain ordinance, grading ordinance and erosion control ordinance) and other applications of police power. The term describes such federal, state or local regulations, in any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

“Floodproofing” means any combination of structural and nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

“Freeboard” means a factor of safety usually expressed in feet above a flood level for purposes of floodplain management. “Freeboard” tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.

“Higher Regulatory Standard” means any floodplain management regulations adopted by the State or Local Community which are more restrictive than the criteria set forth in the NFIP regulations.

“Highest Adjacent Grade” means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

“Historic Structure” means any structure that is:

- (a) Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- (b) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
- (c) Individually listed on a State inventory of historic places in States with historic preservation programs which have been approved by the Secretary of the Interior; or
- (d) Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
 - (1) By an approved State program as determined by the Secretary of the Interior; or
 - (2) Directly by the Secretary of the Interior in States without approved programs.

“Increase Cost of Compliance (ICC)” means the coverage by a standard flood insurance policy under the NFIP that provides for the payment of a claim for the cost to comply with the State of New Jersey and the City of Margate Floodplain management laws or ordinances after a direct physical loss by flood, the City of Margate City declares the structure to be “substantially” or “repetitively” flood damaged. ICC coverage is provided for in every standard NFIP flood policy, and will help pay for the cost to flood proof, relocate, elevate, or demolish the structure.

“Lateral Addition” are improvements that increase the square footage and footprint of a structure. Commonly, this includes the structural attachment of a bedroom, den, recreational room, enclosed porch, or other type of addition to an existing structure. If the addition is a “substantial improvement”, then the existing home and addition needs to be elevated to the higher regulatory standard pursuant to the 1) Base Flood Elevation (BFE), 2) Advisory Base Flood Elevation (ABFEs), 3) Best Available Data, whichever is greater, or any subsequently released flood hazard maps as established by FEMA.

"Lowest Floor" means the lowest floor of the lowest enclosed area [including basement]. An unfinished or flood resistant enclosure, useable solely for the parking of vehicles, building access or storage in an area other than a basement is not considered a building's lowest floor provided that such enclosure is not built so to render the structure in violation of other applicable non-elevation design requirements.

"Manufactured Home" means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. The term "manufactured home" does not include a "recreational vehicle".

"Manufactured Home Park or Manufactured Home Subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

"Map" means the Flood Insurance Rate Map (FIRM) for a community issued by the Agency.

"Market Value" pertains to the structure in question, not the land, landscaping or detached accessory structures on the property. The market value of a structure reflects its original quality, subsequent improvements, physical age of the building components and current condition.

"Mean Sea Level" means, for purposes of the report Flood Insurance Study (FIS) and Flood Insurance Rate Map (FIRM), the National Geodetic Vertical Datum (NGVD) of 1929, is the elevation to which base flood elevations shown are referenced in regards to the average height of the sea for all stages of the tide. For the purpose of the Advisory Flood Hazard Maps, the North American Vertical Datum (NAVD) 1988 is the reference to which base flood elevations shown are reference I regards to the average height of the sea for all stages of the tide.

"New Construction" means structures for which the start of construction commenced on or after the effective date of a floodplain regulation adopted by a community and includes any subsequent improvements to such structures.

"New Manufactured Home Park or Subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of the flood plain management regulations adopted by the municipality.

"Participating Community" also known as an eligible community, means a community in which FEMA has authorized the sale of flood insurance.

Preliminary Flood Insurance Rate Map (FIRM) – means the draft version of the FIRM released for public comment before finalization and adoption.

“Preliminary Regulatory Maps and Working Maps” means the flood hazard maps that will supersede the Advisory Flood Hazard Maps and shall be the basis of delineation of the areas of flood hazards applicable to the City of Margate City upon their release to the public by FEMA.

“Primary Frontal Dune” means a continuous or nearly continuous mound or ridge of sand with relatively steep seaward and landward slopes immediately landward and adjacent to the beach and subject to erosion and overtopping from high tides and waves from coastal storms. The inland limit of the primary frontal dune occurs at the point where there is a distinct change from the relatively steep slope to a relatively mild slope.

"Recreational vehicle" means a vehicle which is [i] built on a single chassis; [ii] 400 square feet or less when measured at the longest horizontal projections; [iii] designed to be self-propelled or permanently towable by a light duty truck; and [iv] designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

“Repetitive Loss” means

- a. Four or more paid flood losses of more than \$1,000 each or,
- b. Two paid flood losses within a 10-year period that, in the aggregate, equal or exceed the current value of the insured property; or
- c. Three or more paid losses that, in the aggregate, equal or exceed the current value of the insured property.

“Sand Dunes” means naturally occurring or man-made accumulations of sand in ridges or mounds landward of the beach.

“Severe Repetitive Loss” means any residential property that is covered under an NFIP flood insurance policy and:

- (a) That has at least four NFIP claim payments (building payments and contents) over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or
- (b) For which at least two separate payments (building payments only) have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building.

For both (a) and (b) above, at least two of the referenced claims have occurred within any ten-year period, and must be greater than 10 days apart.

"Start of Construction" for other than new construction or substantial improvements under the Coastal Barrier Resources Act (P.L. No. 97-348) includes substantial improvements and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site such as the pouring of a slab or footings, the installation of piles, the

construction of columns, or any work beyond the stage of excavation, or the placement of a manufactured home on a foundation.

Permanent construction does not include land preparation, such as clearing, grading and filling nor does it include the installation of streets and/or walkways, nor does it include excavation for a basement, footings or piers, or foundations or the erection of temporary forms, nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

"Structure" means a walled and roofed building, a manufactured home, or a gas or liquid storage tank that is principally above ground.

Accumulative Substantial Damage – Any reconstruction, rehabilitation, addition or other improvement of a structure that equals or exceeds 50 percent of the market value of the structure at the time of the improvement or repair when counted accumulatively for 7 years.

"Substantial Damage" means damage of any origin sustained by a structure whereby the cost of restoring the structure to it's before damaged condition would equal or exceed **50 percent** of the market value of the structure before the damage occurred. Substantial Damage also means flood-related damages sustained by a structure on two or more separate occasions during a 7 year period for which the cost of repairs at the time of each such flood event, on the average, equals or exceeds 25 percent of the market value of the structure before the damages occurred.

"Substantial Improvement" means any reconstruction, rehabilitation, addition, or other improvement of a structure during a **7 year period** the cost of which exceeds **50 percent** of the market value of the structure before the "start of construction" of the improvement. Substantial improvement also means "accumulative substantial improvement." This term includes structures which have incurred "substantial damage", regardless of the actual repair work performed or "repetitive loss".

The term does not, however, include either:

(1) Any project for improvement of a structure to correct existing violations of State or local health, sanitary or safety code specifications which have been identified by the local code enforcement officer and which are the minimum necessary to assure safe living conditions; or

(2) Any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure".

"Variance" means a grant of relief from the requirements of this ordinance that permits construction in a manner that would otherwise be prohibited by this ordinance.

“Violation” means the failure of a structure or other development to be fully compliant with this ordinance. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in this ordinance is presumed to be in violation until such time as that documentation is provided.

SECTION 3 GENERAL PROVISIONS

§ 145-6. LANDS TO WHICH THIS ORDINANCE APPLIES - APPLICABILITY

This ordinance shall apply to all areas of special flood hazards within the jurisdiction of the City of Margate City, Atlantic County, New Jersey.

§145-7. BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD

The areas of special flood hazard for the City of Margate City Community No. 345304, are identified and defined on the following documents prepared by the Federal Emergency Management Agency:

- (a) A scientific and engineering report entitled “Flood Insurance Study Supplement-Wave Height Analysis, City of Margate City, New Jersey, Atlantic County,” dated April 18, 1983.
- (b) Flood Insurance Rate Map for City of Margate City, Atlantic County, New Jersey as shown on Panel 0001 C whose effective date is October 18, 1983.
- (c) Advisory Base Flood Elevations from Advisory Flood Hazard Maps “Atlantic City, NW”, “Ocean City NE” dated December 14, 2012. These documents shall take precedence over only Base Flood Elevations (BFEs) previously derived from effective panels and FIS in construction and development regulations only. Where the Special Flood Hazard Area (SFHA) BFE and the Advisory Base Flood Elevation (ABFE) conflict or overlap, whichever imposes the more stringent requirement shall prevail.
- (d) Best Available Flood Hazard Data. These documents shall take precedence over effective panels and FIS in construction and development regulations only. Where the effective mapping conflicts or overlaps with the Best Available Flood Hazard Data mapping, whichever imposes the more stringent requirement shall prevail.

The above documents are hereby adopted and declared to be a part of this ordinance. The Flood Insurance Study and maps are on file at the Municipal Building, 9001 Winchester Avenue, Margate City, New Jersey 08402.

§145-8. PENALTIES FOR NONCOMPLIANCE

No structure or land shall hereafter be constructed, located, extended, converted, or altered without full compliance with the terms of this ordinance and other applicable regulations. Violation of the provisions of this ordinance by failure to comply with any of its requirements (including violations of conditions and safeguards established in connection with conditions) shall constitute a misdemeanor. Any person who violates this ordinance or fails to comply with any of its requirements shall upon conviction thereof be fined not more than (\$500) or imprisoned for not more than (30) days, or both, for each violation, and in addition shall pay all costs and expenses involved in the case. Each and every day any violation continues shall be considered a separate offense, punishable by a like fine and/or jail sentence. Nothing herein contained shall prevent the City of Margate City from taking such other lawful action as is necessary to prevent or remedy any violation.

§ 145-9. ABROGATION AND GREATER RESTRICTIONS

This ordinance is not intended to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this ordinance and other ordinance, easement, covenant, or deed restriction conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

§145-10. INTERPRETATION

In the interpretation and application of this ordinance, all provisions shall be:

- (1) Considered as minimum requirements;
- (2) Liberally construed in favor of the governing body; and,
- (3) Deemed neither to limit nor repeal any other powers granted under State statutes.

§145-11. WARNING AND DISCLAIMER OF LIABILITY

The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This ordinance does not imply that land outside the area of special flood hazards or uses permitted within such areas will be free from flooding or flood damages.

This ordinance shall not create liability on the part of the City of Margate City, or by any officer or employee thereof or the Federal Insurance Administration, for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made there under.

**SECTION 4
ADMINISTRATION****§145.12. ESTABLISHMENT OF DEVELOPMENT PERMIT**

A. All elevations shall be measured in feet relative to the North American Vertical Datum of 1988 (NAVD88). The use of National Geodetic Vertical Datum of 1929 shall not be acceptable.

B. A Development Permit shall be submitted, prior to undertaking any development activities, to the Floodplain Management Administrator on forms furnished by him or her, and must include, but not limited to, the following plans in duplicate drawn to scale showing the nature, location, dimensions, and elevations of the area under consideration for development; existing structure(s) and other features; proposed structure(s), earthen fill, storage of materials or equipment, drainage facilities, perimeter setbacks, environmental features such as base floodplain areas, wetlands, and other protected areas; the location of the foregoing.

Specifically, the following information, certified by a professional who is authorized to certify such information in the State of New Jersey, is required:

(1) Application Stage:

- (a) Elevation in relation to mean sea level, of the lowest floor (including basement) of all structures;
- (b) Elevation in relation to mean sea level to which any structure has been flood-proofed.
- (c) Certification by a registered professional engineer or architect that the flood-proofing methods for any nonresidential structure meet the flood-proofing criteria and,
- (d) Existing and proposed infrastructure.
- (e) Description of the extent to which any watercourse will be altered or relocated as a result of proposed development.
- (f) Building plans for any walls to be used to enclose space below the base flood elevation.

(2) Construction Stage:

Upon the placement of the top of block, the lowest floor or flood-proofing by whatever construction means, it shall be the duty of the permit holder to submit to the Floodplain Administrator a certification of the elevation of the lowest floor or flood-proofed elevation, as built, in relation to mean sea level. Said certification shall be prepared by or under the direct supervision of a registered land surveyor or professional engineer who is authorized to certify

such information in the State of New Jersey, and certified by same. Any work undertaken prior to submission of the certification shall be at the permit holder's risk.

(3) The Floodplain Administrator shall review the lowest floor elevation and flood-proofing certificate. Should these documents be found not in conformance with the requirements of this ordinance, the permit holder shall immediately cease further work, and shall correct any deficiencies. Failure of the permit holder to submit the surveyed lowest floor elevation and flood-proofing certificate, and failure to correct said deficiencies required hereby, shall be the cause to issue a stop-work order for the project.

§ 145-13. DESIGNATION OF THE FLOOD DAMAGE PREVENTION ORDINANCE ADMINISTRATOR

The Governing Body of the City of Margate City hereby appoints the Construction Official/Floodplain Administrator to administer and implement the provisions of this ordinance, by granting or denying development permit applications in accordance with its provisions and is hereby referred to as the Floodplain Management Administrator, or the Floodplain Administrator.

§ 145-14. DUTIES AND RESPONSIBILITIES OF THE ADMINISTRATOR

Duties of the Construction Official/Floodplain Administrator shall include, but not be limited to:

A. PERMIT REVIEW. The Construction Official Shall:

- (1) Review all development permits to determine that the permit requirements of this ordinance have been satisfied.
- (2) Review all development permits to determine that all necessary permits have been obtained from those Federal, State or local governmental agencies from which prior approval is required.
- (3) Review certified plans and specifications for compliance with the requirements of this ordinance.
- (4) Review all development permits in the areas of special flood hazard except in the coastal high-hazard area to determine if the proposed development adversely affects the flood-carrying capacity of the areas of special flood hazard. For the purpose of this chapter, "adversely affects" means that the cumulative effect of the proposed development, when combined with all other existing and anticipated development, will increase the water surface of the base flood more than 0.2 foot at any point.

- (5) Review all development permits in the coastal high-hazard area of the area of special flood hazard to determine if the proposed development alters sand dunes so as to increase potential flood damage.
- (6) Review plans for walls to be used to enclose space below the base flood elevation.
- (7) Coordinate with Planning, Zoning, and Public Works and other Departments in the community to assure that the requirements of this ordinance are fully met.
- (8) Participate actively in evaluating the variance requests and provide input and recommendations in variance hearings/proceedings.

B. USE OF OTHER BASE FLOOD AND FLOODWAY DATA

When base flood elevation and floodway data has not been provided in accordance with Section 145.7, BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD, the Construction Official/Floodplain Administrator shall obtain, review, and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other source, in order to administer Sections 145-18A, SPECIFIC Provisions for Flood Hazard Reduction, Residential Construction, and 145-18B, SPECIFIC Provisions for Flood Hazard Reduction, Nonresidential Construction.

C. INFORMATION TO BE OBTAINED AND MAINTAINED

- (1) Obtain and record the actual elevation (in relation to mean sea level) of the lowest floor (including basement) of all new or substantially improved structures, and whether or not the structure contains a basement.
- (2) For all new or substantially improved flood-proofed structures:
 - [i] verify and record the actual elevation (in relation to mean sea level); and
 - [ii] maintain the flood-proofing certifications required in Section 145-13 B(c).
- (3) Maintain for public inspection all records pertaining to the provisions of this ordinance.
- (4) In coastal high hazard areas, obtain certification from a registered professional engineer or architect that the elevation requirements of Section 145-19 B(1) and anchoring requirements of Sections 145-19 B(2).
- (5) Maintain for public inspection all records pertaining to the provisions of this chapter.

D. ALTERATION OF WATERCOURSES

- (1) Notify adjacent communities and the New Jersey Department of Environmental Protection, Dam Safety and Flood Control Section and the Land Use Regulation Program prior

to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Insurance Administration.

(2) Require that maintenance is provided within the altered or relocated portion of said watercourse so the flood carrying capacity is not diminished.

E. INTERPRETATION OF FIRM BOUNDARIES

Make interpretations where needed, as to the exact location of the boundaries of the areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and

actual field conditions). The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in this chapter.

F. CRITICAL FACILITIES

Construction of new Critical Facilities shall have the lowest floor elevated at 2 feet above the base flood elevation. Flood-proofing and sealing measures must be taken to ensure that toxic substances will not be displaced by or released into floodwaters. Access routes elevated to or above the level of the base flood elevations shall be provided to all critical facilities to the maximum extent possible.

§145-15. VARIANCE PROCEDURE

A. APPEAL BOARD

- (1) The Planning Board, as established by the City of Margate City shall hear and decide appeals and requests for variances from the requirements of this ordinance.
- (2) The Planning Board of the City of Margate City shall hear and decide appeals when it is alleged there is an error in any requirement, decision, or determination made by the Construction Official/Floodplain Manager in the enforcement or administration of this ordinance.
- (3) Those aggrieved by the decision of the Planning Board, or any taxpayer, may appeal such decision to the Superior Court of New Jersey, as provided in NJSA 40:55D-17h & 18.
- (4) In passing upon such applications, the Planning Board shall consider all technical evaluations, all relevant factors, standards specified in other sections of this ordinance, and:
 - (a) the danger that materials may be swept onto other lands to the injury of others;
 - (b) the danger to life and property due to flooding or erosion damage;

- (c) the susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
 - (d) the importance of the services provided by the proposed facility to the community;
 - (e) the necessity to the facility of a waterfront location, where applicable;
 - (f) the availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;
 - (g) the compatibility of the proposed use with existing and anticipated development;
 - (h) the relationship of the proposed use to the comprehensive plan and flood plain management program of that area;
 - (i) the safety of access to the property in times of flood for ordinary and emergency vehicles;
 - (j) the expected heights, velocity, duration, rate of rise, and sediment transport of the waters and the effects of wave action, if applicable, expected at the site;
 - (k) the costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water systems, and streets and bridges; and
 - (l) The request for a variance is not an after-the-fact request.
- (5) Upon consideration of the factors of this chapter and the purposes of this ordinance, the Planning Board may attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.
- (6) The Construction Code Official/Floodplain Administrator shall maintain the records of all appeal actions, including technical information, and report any variances to the Federal Insurance Administration upon request.

B. CONDITIONS FOR VARIANCES

- (1) Generally variances may be issued for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures below the base flood level, providing items (a-l) in Section 145-16A have been fully considered. As the lot size increases beyond the one-half acre, the technical justification for issuing the variance increases.
- (2) Variances may be issued for the repair or rehabilitation of historic structures upon a

determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as a historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.

(3) Variances shall only be issued upon a determination that the variance is the minimum necessary deviation from the requirements of this ordinance.

(4) Variances may be issued when there is:

(a) A showing of good and sufficient cause.

(b) A determination that failure to grant the variance would result in exceptional hardship.

(c) A determination that the granting of a variance will not result in increased flood heights, additional threats to public expense, create a nuisance, cause fraud on or victimization of the public, or conflict with existing local laws or ordinance.

(5) Any applicant to whom a variance is granted shall be given written notice that the structure will be permitted to be built with a lowest floor elevation below the base flood elevation and that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced lowest floor elevation.

SECTION 5

PROVISIONS FOR FLOOD HAZARD REDUCTION

§145-16. GENERAL PROVISIONS FOR FLOOD HAZARD REDUCTION

In all areas of special flood hazards, compliance with the applicable requirements of the Uniform Construction Code (N.J.A.C. 5:23) and the following standards, whichever is more restrictive, is required:

A. ANCHORING

(1) All new construction and substantial improvements shall be anchored to prevent flotation, collapse, or lateral movement of the structure.

(2) All manufactured homes to be placed or substantially improved shall be anchored to resist flotation, collapse or lateral movement. Methods of anchoring may include, but are not to be limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind forces.

B. CONSTRUCTION MATERIALS AND METHODS

(1) All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.

(2) All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.

C. UTILITIES

(1) All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system;

(2) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharge from the systems into flood waters;

(3) On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding; and

(4) For all new construction and substantial improvements the electrical, heating, ventilation, plumbing and air-conditioning equipment and other service facilities shall be designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

D. SUBDIVISION PROPOSALS

(1) All subdivision proposals and other proposed new development shall be consistent with the need to minimize flood damage;

(2) All subdivision proposals and other proposed new development shall have public utilities and facilities such as sewer, gas, electrical, and water systems located and constructed to minimize flood damage;

(3) All subdivision proposals and other proposed new development shall have adequate drainage provided to reduce exposure to flood damage; and,

(4) Base flood elevation data shall be provided for subdivision proposals and other proposed new development which contain at least 50 lots or 5 acres (whichever is less).

E. ENCLOSURE OPENINGS. All new construction and substantial improvements having fully enclosed areas below the lowest floor that are non-habitable, unfinished or flood-resistant space below the base flood elevation (BFE) usable solely for parking of vehicles, building access or storage in an area other than a basement and which are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria:

- (1) A minimum of two (2) openings having a total net area of not less than one (1) square inch for every square foot of enclosed area subject to flooding shall be provided.
- (2) The bottom of all openings shall be no higher than one (1) foot above grade.
- (3) Openings may be equipped with screens, louvers, or other covering or devices provided that they permit the automatic entry and exit of floodwaters.

§ 145-17. Specific Provisions for Flood Hazard Reduction.

In all areas of special flood hazards where base flood elevation data have been provided as set forth in Section 145-7, BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD or in SECTION 145-15B , Use of Other Base Flood Data, the following standards are required:

A. RESIDENTIAL CONSTRUCTION

1. New construction and substantial improvement of any residential structure shall have the lowest floor, including basement, together with the attendant utilities and sanitary facilities, elevated at or above the base flood elevation or advisory base flood elevation whichever is more restrictive, plus one foot of freeboard in any A Zone or two feet of freeboard in a V Zone.
2. Require within any A Zone on the municipality's FIRM that all new construction and substantial improvement of any residential structure shall have the lowest floor, including basement, elevated above the highest adjacent grade one foot above the depth number specified in feet (at least three feet if no depth number is specified) or at above the advisory base flood elevation plus one foot, whichever is more restrictive. And, require adequate drainage paths around structures on slopes to guide floodwater around and away from proposed structures.

B. NONRESIDENTIAL CONSTRUCTION

In an Area of Special Flood Hazard Area (SFHA), all new construction and substantial improvement of any commercial, industrial or other nonresidential structure shall either have the lowest floor, including basement, together with the attendant utilities and sanitary facilities:

- (1) Elevated to or above the base flood elevation or advisory base flood elevation whichever is more restrictive, plus one foot of freeboard in any A Zone or two feet of freeboard in a V Zone; and
- (2) Require within any A zone on the municipality's FIRM that all new Construction and substantial improvement of any commercial, industrial or other nonresidential structure shall either have the lowest floor, including basement, elevated above the highest adjacent grade one

foot above the depth number specified in feet (at least three feet if no depth number specified) or at or above the advisory base flood elevation plus one foot of freeboard in any A Zone or two feet of freeboard in any V Zone. And, require adequate drainage paths around structures on slopes to guide floodwaters around and away from proposed structures; or

(3) Be flood proofed so that below the base flood level plus one foot, or advisory base flood elevation plus one foot of freeboard in any A Zone or two feet of freeboard in a V Zone; the structure is watertight with walls substantially impermeable to the passage of water;

(4) Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and,

(5) Be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the applicable provisions of this subsection shall be required. Such certification shall be provided to the official as set forth in SECTION.

C. MANUFACTURED HOMES

(1) Manufactured homes shall be anchored in accordance with Section 145-17.

(2) All manufactured homes to be placed or substantially improved within an area of special flood hazard shall be elevated on a permanent foundation such that the top of the lowest floor is at or above the base flood elevation or advisory base flood elevation, plus the applicable freeboard the same being one foot in any A Zone and two feet in any V Zone.

§ 145-18. COASTAL HIGH HAZARD ZONES

Coastal high-hazard areas (V or VE Zones) are located within an area of special flood hazard established in Section 145-7. These areas have special flood hazards associated with high-velocity waters from tidal surges and hurricane wave wash: therefore, the following provisions shall apply:

A. LOCATION OF STRUCTURES

(1) All buildings or structures, with the exception of those buildings or structures currently in existences, shall be located landward of the reach of the mean high tide.

(2) Any building or structure currently in existence and being beyond the mean high tide may be replaced in the same or lesser footprint, subject to NJ DEP approval.

B. CONSTRUCTION METHODS

(1) Elevation – all new construction and substantial improvements shall be elevated on piling or columns so that;

- (a) the bottom of the lowest horizontal structural member of the lowest floor (excluding the piling or columns), is elevated to or above the base flood elevation (published FIS/FIRM), the advisory base flood elevation or as required by the Uniform Construction Code (N.J.A.C. 5:23) whichever is more restrictive plus two (2) feet of freeboard, and
- (b) for all new construction and substantial improvements within the coastal high hazard areas (V or VE Zones) as delineated by the published Flood Insurance Rate Map (FIRM) or the best available flood hazard data (whichever is more restrictive) shall have all space below the lowest floor's supporting member open so as to not impede the flow of water, except for breakaway walls as provided or in SECTION 5.4-2 [4].

(2) Structural Support

- (a) All new construction and substantial improvements shall be securely anchored on piling or columns.
 - (b) The pile or column foundation and structure attached thereto shall be anchored to resist flotation, collapse or lateral movement due to the effects of wind and water loading values, each of which shall have a one-percent chance of being equaled or exceeded in any given year (one-hundred-year mean recurrence interval).
 - (c) There shall be no fill used for structural support.
- (3) Certification – a registered professional engineer or architect shall develop or review the structural design specifications and plans for the construction and shall certify that the design and methods of construction to be used are in accordance with accepted standards of practice for compliance with the provisions of Subsection B(1) and (2)(a) and (b).

(4) Space below the lowest floor (enclosure below BFE)

- (a) Any alteration, repair, reconstruction or improvement to a structure started after the enactment of this chapter shall not enclose the space below the lowest floor unless breakaway walls, open wood latticework or insect screening are used as provided for in this section.
- (b) Breakaway walls, open wood latticework or insect screening shall be allowed below the base flood elevation, provided that they are intended to collapse under wind and water loads without causing collapse, displacement or other structural

damage to the elevated portion of the building or supporting foundation system. Breakaway walls shall be designed for a safe loading resistance of not less than 10 and no more than 20 pounds per square foot. Use of breakaway walls which exceed a design safe loading of 20 pounds per square foot (either by design or when so required by local or state codes) may be permitted only if a registered professional engineer or architect certifies that the designs proposed meet the following conditions:

- (1) Breakaway wall collapse shall result from a water load less than that which would occur during the base flood.
- (2) The elevated portion of the building and supporting foundation system shall not be subject to collapse, displacement or other structural damage due to the effects of wind and water load acting simultaneously on all building components, structural and nonstructural. Water loading values used shall be those associated with the base flood. Wind loading values used shall be those required by applicable State and local building standards.
- (3) If breakaway walls are utilized, such enclosed space shall be use solely parking of vehicles, building access or storage and not for human habitation.
- (4) Prior to construction, plans for any breakaway wall must be submitted to the Construction Official for approval.

C. SAND DUNES

There shall be no alteration of sand dunes which would increase potential flood damage.

Section 6

All Ordinances or parts of Ordinances inconsistent herewith are hereby repealed to the extent of such inconsistency. It is the intention of this Ordinance to replace Chapter 145 Flood Damage Prevention in total and pursuant to the instruction by the State of New Jersey, Department of Environmental Protection, Office of Engineering and Construction, Bureau of Dam Safety and Flood Control,

Section 7

Should any section, subsection, paragraph, clause, sentence or other portion of this Ordinance be adjudged by a Court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this Ordinance.

Section 8

This Ordinance shall take effect on final passage, approval, and publication.

Introduction: May 4, 2017
Publication: May 4, 2017
Adoption: May 18, 2017
Publication: May 23, 2017

A motion to adopt Ordinance #09-2017 was put forth by Mayor Becker, second by Mr. Amodeo

CITY OF MARGATE CITY
ORDINANCE #09 – 2017

**AN ORDINANCE AMENDING CHAPTER 269, WATER OF THE CODE OF THE CITY
OF MARGATE CITY, COUNTY OF ATLANTIC AND STATE OF NEW JERSEY**

NOW THEREFORE BE IT ORDAINED by the Commissioners of the City of Margate,
County of Atlantic and State of New Jersey as follows:

SECTION 1. Margate City Code Chapter 269, Water, Article III, Sprinkling and Watering
Regulations, §269-8 shall be amended as follows:

§269.8 – Time Restrictions.

Add the following language:

C. No watering will be permitted on Sunday in any district during the period of
regulation.

D. Any such sprinkling or watering must be confined to the period between 5:00 a.m.
and 7:00 a.m. or 7:00 p.m. and 9:00 p.m.

SECTION 2: All ordinances or parts of ordinances inconsistent with any terms of this ordinance
are hereby repealed to the extent of such inconsistency only.

SECTION 3: This ordinance shall take effect upon its final passage and publication as required
by law.

Introduction: May 4, 2017

Publication: May 4, 2017

Enactment: May 18, 2017

Publication: May 23, 2017

RESOLUTIONS:

RESOLUTION #100-2017 CERTIFICATION OF THE 2016 ANNUAL AUDIT

WHEREAS, N.J.S.A. 40A: 5-4 requires the governing body of every local unit to have made an annual audit of its books, accounts and financial transactions, and

WHEREAS, the Annual Report of Audit for the year 2016 has been filed by a Registered Municipal Accountant with the Municipal Clerk pursuant to N.J.S.A. 40A: 5-6, and a copy has been received by each member of the governing body; and

WHEREAS, R.S. 52:27BB-34 authorizes the Local Finance Board of the State of New Jersey to prescribe reports pertaining to the local fiscal affairs; and

WHEREAS, the Local Finance Board has promulgated N.J.A.C. 5:30-6.5, a regulation requiring that the governing body of each municipality shall, by resolution, certify to the Local Finance Board of the State of New Jersey that all members of the governing body have reviewed, as a minimum, the sections of the annual audit entitled “Comments and Recommendations; and

WHEREAS, the members of the governing body have personally reviewed, as a minimum, the Annual Report of Audit, and specifically the sections of the Annual Audit entitled “Comments and Recommendations, as evidenced by the group affidavit form of the governing body attached hereto; and

WHEREAS, such resolution of certification shall be adopted by the Governing Body no later than forty-five days after the receipt of the annual audit, pursuant to N.J.A.C. 5:30-6.5; and

WHEREAS, all members of the governing body have received and have familiarized themselves with, at least, the minimum requirements of the Local Finance Board of the State of New Jersey, as stated aforesaid and have subscribed to the affidavit, as provided by the Local Finance Board; and

WHEREAS, failure to comply with the regulations of the Local Finance Board of the State of New Jersey may subject the members of the local governing body to the penalty provisions of R.S. 52:27BB-52, to wit:

R.S. 52:27BB-52: A local officer or member of a local governing body who, after a date fixed for compliance, fails or refuses to obey an order of the director (Director of Local Government Services), under the provisions of this Article, shall be guilty of a misdemeanor and, upon conviction, may be fined not more than one thousand dollars (\$1,000.00) or imprisoned for not more than one year, or both, in addition shall forfeit his office.

NOW, THEREFORE BE IT RESOLVED, That the Commission of the City of Margate City, hereby states that it has complied with N.J.A.C. 5:30-6.5 and does hereby submit a certified copy of this resolution and the required affidavit to said Board to show evidence of said compliance.

**CITY OF MARGATE
COUNTY OF ATLANTIC
STATE OF NEW JERSEY**

We, the Mayor and Commissioners of the City of Margate City in the County of Atlantic, being duly sworn according to law, upon our oath depose and say:

1. We are duly elected members of the Commission of the City of Margate City in the County of Atlantic;

2. In the performance of our duties, and pursuant to N.J.A.C. 5:30-6.5, we have familiarized ourselves with the contents of the Annual Municipal Audit filed with the Clerk pursuant to N.J.S.A. 40A:5-6 for the year 2016;
3. We certify that we have personally reviewed and are familiar with, as a minimum, the sections of the Annual Report of Audit entitled "Comments and Recommendations."

Michael Becker, Mayor (L.S.) _____

John Amodeo, Commissioner (L.S.) _____

Maury Blumberg, Commissioner (L.S.) _____

Sworn to and subscribed before me this
_____ Day of _____

Notary Public of New Jersey

The Municipal Clerk shall set forth the reason for the absence of signature of any members of the governing body.

IMPORTANT: This certificate must be sent to the Bureau of Financial Regulation and Assistance, Division of Local Government Services, P.O. Box 803, Trenton, New Jersey 08625.

RESOLUTION #101-2017
AUTHORIZED PAYMENT - COLMAR HOME CENTER

WHEREAS, the Board of Commissioners of the City of Margate City, are in receipt of the bi-monthly claim as submitted by the Chief Financial Officer for payment as follows:

COLMAR HOME CENTER

\$1,443.83

NOW, THEREFORE, BE IT RESOLVED that the Board of Commissioners does hereby approve the Margate City Bill for Colmar Home Center, attached hereto be paid in full.

RESOLUTION #103-2017 AUTHORIZING CHANGE ORDER #1 (INCREASE)
2015 CDBG Beach Bulkhead

WHEREAS, the Board of Commissioners of the City of Margate City in the County of Atlantic, State of New Jersey has on February 2, 2017 authorized the awarding of a contract to Albert Marine Construction, Inc., 65 Pennsylvania Avenue, Waretown, NJ, 08758, as per their bid proposal in an amount of \$27,525.00; and

WHEREAS, City Engineer, Ed Walberg, has prepared a letter dated May 3, 2017 regarding increase in Change Order #1 that related to Quantity Adjustment for Sidewalk in the amount of \$2,826.00, resulting in a new contract total of \$30,351.00; and

WHEREAS, the Chief Financial Officer has certified in writing hereon that funds are available under Capital Ordinance #2016-05C04-55-978-903; and

NOW, THEREFORE, BE IT RESOLVED by the Board of Commissioners of the City of Margate City in the County of Atlantic, State of New Jersey, does hereby authorize the issuance of Change Order No. 1 to the contract with Albert Marine Construction, Inc., 65 Pennsylvania Avenue, Waretown, NJ, 08758,: and

BE IT FURTHER RESOLVED that a certified copy of this resolution be forwarded to the following:

1. Lisa McLaughlin, Chief Financial Officer
2. Ed Walberg, City Engineer

RESOLUTION #104-2017 AUTHORIZING CHANGE ORDER #3 (Decrease)
MUNICIPAL BUILDING PLAYGROUND UPGRADES

WHEREAS, the Board of Commissioners of the City of Margate City in the County of Atlantic, State of New Jersey has on February 2, 2017 authorized the awarding of a contract to Iaconelli Contracting, 943 Mill Road, Pleasantville, NJ in the amount of \$68,144.00; and

WHEREAS, City Engineer, Ed Walberg, has prepared a letter dated April 4, 2017 regarding increase in Change Order #1 that related to As-Built DGA Quality Course and Prime Coat Reduction in the amount of \$1,131.00, resulting in a new contract total of \$69,275.00; and

WHEREAS, City Engineer, Ed Walberg, has prepared a letter dated April 25, 2017 regarding increase in Change Order #2 that related to As-Built Paving and Court Surface Color Coat Quantity in the amount of \$6,634.00, resulting in a new contract total of \$75,909.00; and

WHEREAS, City Engineer, Ed Walberg, has prepared a letter dated May 11, 2017 regarding decrease in Change Order #3 that related to As-Built Striping Quality in the amount of \$7.20, resulting in a new contract total of \$75,901.80; and

WHEREAS, the Chief Financial Officer has certified in writing hereon that funds are available under Capital Ordinance #2016-05C04-55-978-904; and

NOW, THEREFORE, BE IT RESOLVED by the Board of Commissioners of the City of Margate City in the County of Atlantic, State of New Jersey, does hereby authorize the issuance of Change Order # 3 to the contract with Iaconelli Contracting, 943 Mill Road, Pleasantville, NJ for an decrease of \$7.20 amending the original contract amount from \$68,144.00 to the new contract amount of \$75,901.80; and

BE IT FURTHER RESOLVED that a certified copy of this resolution be forwarded to the following:

1. Lisa McLaughlin, Chief Financial Officer
2. Ed Walberg, City Engineer
3. Iaconelli Contracting, 943 Mill Road, Pleasantville, NJ

RESOLUTION #106-2017 DECLARING CLOSED SESSION

WHEREAS, Section 8 of the Open Public Meetings Act, Chapter 231, P.L. 1975, permits the exclusion of the public from a meeting in certain circumstances; and

WHEREAS, this public body is of the opinion that such circumstances presently exist;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Margate, County of Atlantic as follows:

1. The Public shall be excluded from discussion of and action upon the hereinafter specified subject matters.
2. The general nature of the subject matter to be discussed is as follows:
C1. Potential Litigation
3. It is anticipated at this time that the Municipal Clerk shall on a six (6) month basis, review the minutes of closed sessions of the City of Margate and make a recommendation to the Governing Body which minutes should be considered for

public record. The minutes which are made public shall not thereafter be treated as confidential, but may be seen and copied by any person(s) in the same manner as any meeting minutes of the City of Margate.

4. This resolution shall take effect immediately
